

TECHNICAL DATA SHEET

Aloe Freshness Ornat Fragrance Oil

Product Name: Freshness of Aloe Ornat Fragrance Oil

Olfactory Classification: Freshness of Aloe Ornat Fragrance Oil belongs to the Green-Floral fragrance family, characterized by a distinctly fresh, herbal, and subtly woody profile. The composition combines aromatic, floral, and green notes with a clean woody base, creating a natural and sophisticated olfactory character.

Fragrance Oil Description: The composition is fresh, elegant, and well-balanced, with medium intensity and stable diffusion. The fragrance profile is green, clean, and soft, featuring a pronounced natural character. The opening is built around a combination of elemi, cardamom, and carrot. Elemi provides a citrus-resinous and slightly spicy nuance, cardamom contributes aromatic warmth, while carrot introduces earthy and subtly sweet undertones, creating an original and distinctive first impression.

In the heart of the composition, a green-floral accord develops, dominated by rose, ylang-ylang, herbal accords, and aloe vera. Rose and ylang-ylang provide floral richness and elegance, while the herbal accord and aloe vera introduce pronounced green freshness and natural lightness. This combination forms a harmonious and stable heart with a distinct impression of fresh vegetation and clean botanical tones.

The base structure is centered around cedarwood. Cedarwood provides a clean woody foundation, stabilizes the composition, and enhances the longevity of the fragrance. The dry-down is elegant, smooth, and pleasant, with a subtle woody character that completes the overall olfactory profile.

The dominant accords of this composition include green fresh, herbal aromatic, floral soft, and woody clean facets, which together create a natural and sophisticated fragrance identity. Green and herbal aspects remain dominant throughout, while the woody base contributes depth, stability, and lasting performance.

Application: Freshness of Aloe Ornat Fragrance Oil is intended for use in scented candles and wax applications formulated with a focus on naturally derived products.

TECHNICAL DATA SHEET

The composition was developed as part of a fragrance collection suitable for formulations that may comply with COSMOS Natural and COSMOS Organic standards.

The recommended usage level in formulations ranges between 5% and 7%, ensuring an optimal balance between fragrance intensity and preservation of the natural olfactory profile. Due to variations in waxes and base materials, individual testing is recommended in order to optimize dosage levels. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and even diffusion, with a pronounced natural and long-lasting character.
