

TECHNICAL DATA SHEET

Amber Wood Ornat Fragrance Oil

Product Name: Amber Wood Ornat Fragrance Oil

Olfactory Classification: Bois Ambré Ornat Fragrance Oil belongs to the Woody–Oriental fragrance family, characterized by a distinctly warm, resinous, and spicy profile. The composition combines smoky, leathery, and aromatic notes with a rich amber-vanilla base, creating a deep and sophisticated olfactory character.

Fragrance Oil Description: The composition is intense, elegant, and expressively structured, with medium to strong intensity and stable diffusion. The fragrance profile is warm, woody, and subtly smoky, with a pronounced oriental character. The opening is formed through a combination of incense, nutmeg, and leather accords. Incense provides smoky and resinous depth, nutmeg contributes a warm spicy nuance, while the leather accord introduces a robust and elegant character, creating a strong and distinctive first impression.

In the heart of the composition, an aromatic-woody accord develops, dominated by geranium, lavender, and vetiver. Geranium provides a subtly spicy floral nuance, lavender contributes aromatic freshness and balance, while vetiver introduces earthy and dry woody depth. This combination forms a stable and sophisticated heart of the composition.

The base structure is built around sandalwood, tonka bean, vanilla, and amber. Sandalwood provides a creamy woody foundation, tonka bean contributes warm and subtly smoky sweetness, while vanilla introduces gourmand richness. Amber delivers resinous warmth and enhances the longevity of the composition. The dry-down is rich, warm, and long-lasting, with a pronounced sensation of depth and sensory fullness.

The dominant accords of this composition include woody amber, smoky resinous, spicy warm, and vanilla balsamic facets, which together create a complex and sophisticated fragrance profile. Woody and amber aspects remain dominant, while the base ensures stability and extended longevity.

TECHNICAL DATA SHEET

Application: Bois Ambré Ornat Fragrance Oil is intended for use in scented candles and wax applications formulated with a focus on naturally derived products. The composition was developed as part of a fragrance collection suitable for formulations that may comply with COSMOS Natural and COSMOS Organic standards.

The recommended usage level in formulations ranges between 5% and 7%, ensuring an optimal balance between fragrance intensity and preservation of the natural olfactory profile. Due to variations in waxes and base materials, individual testing is recommended in order to optimize dosage levels. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced natural and long-lasting woody-oriental character.
