

## TECHNICAL DATA SHEET

### Baby Love Fragrance Oil

**Product Name:** Baby Love Fragrance Oil

**Olfactory Classification:** Baby Love Fragrance Oil belongs to the Powdery-Floral fragrance family, characterized by a distinctly soft, clean, and comforting profile. The composition combines delicate floral notes with powdery and musky accords, supported by a warm woody-vanilla base that enhances the sensation of cleanliness and sensory comfort.

**Fragrance Oil Description:** The composition is delicate, elegant, and harmonious, with medium intensity and soft diffusion. The fragrance profile is clean, powdery, and gentle, with a pronounced effect of softness and warmth. The opening is formed through a combination of white peony, ylang-ylang, and powdery accords. White peony provides a light and fresh floral nuance, ylang-ylang contributes subtle exotic richness and warmth, while the powdery accord creates a sensation of softness and cleanliness that defines the initial impression of the composition.

In the heart of the composition, a floral accord develops, dominated by rose, jasmine, and violet. Rose provides classic floral elegance, jasmine contributes fullness and sophistication, while violet introduces a delicate powdery and slightly earthy nuance. This combination forms a harmonious and comforting heart of the fragrance.

The base structure is built around sandalwood, tonka bean, and white musk. Sandalwood provides a warm woody foundation and creamy richness, tonka bean contributes vanilla-like and subtly almond nuances, while white musk ensures softness and long-lasting performance. The dry-down is delicate, clean, and persistent, with a pronounced sensation of comfort and sensory warmth.

The dominant accords of this composition include powdery soft, floral delicate, musky clean, and vanilla woody facets, which together create a soft and highly commercially appealing fragrance profile. Powdery and floral aspects remain dominant throughout the fragrance evolution, while the base contributes stability and longevity.

**Application:** Baby Love Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax applications, and other perfumery products. Individual

## TECHNICAL DATA SHEET

testing is recommended in order to determine the optimal concentration depending on the type of base and the desired fragrance intensity.

For wax-based formulations, it is recommended to incorporate the fragrance during the appropriate liquid phase in order to achieve even dispersion. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced and long-lasting powdery-floral character.
