

TECHNICAL DATA SHEET

Black Orchid Fragrance Oil

Product Name: Black Orchid Fragrance Oil

Olfactory Classification: Black Orchid Fragrance Oil belongs to the Oriental–Floral fragrance family, characterized by a distinctly warm, sensual, and mysterious profile. The composition combines spicy, floral, and resinous notes with a rich woody-amber base that enhances depth and longevity.

Fragrance Oil Description: The composition is intense, sophisticated, and richly structured, with medium to strong intensity and stable diffusion. The fragrance profile is warm, floral, and oriental, with a pronounced effect of depth and sensuality. The opening is formed through a combination of elemi, lemon, nutmeg, and coriander. Elemi provides resinous depth with subtle citrus nuances, lemon contributes fresh citrus vibrancy, while nutmeg and coriander introduce a warm spicy structure that creates a complex and elegant first impression.

In the heart of the composition, a rich floral accord develops, dominated by violet, tuberose, and ylang-ylang. Violet provides powdery and slightly earthy softness, tuberose contributes intense and exotic floral richness, while ylang-ylang introduces a warm and almost intoxicating floral dimension. This combination forms a luxurious and sophisticated heart with a pronounced oriental character.

The base structure is built around sandalwood, amber, vanilla, and patchouli. Sandalwood and patchouli provide woody and earthy depth, while amber and vanilla contribute warmth, richness, and gourmand softness. The dry-down is rich, enveloping, and long-lasting, with a pronounced sensation of warmth and sensory fullness.

The dominant accords of this composition include floral oriental, woody warm, patchouli earthy, and vanilla amber facets, which together create an intense and highly commercially attractive fragrance profile. Floral and oriental aspects remain dominant throughout the fragrance evolution, while the base contributes stability and extended longevity.

TECHNICAL DATA SHEET

Application: Black Orchid Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax applications, and other perfumery products. Individual testing is recommended in order to determine the optimal concentration depending on the type of base and the desired fragrance intensity.

For wax-based formulations, it is recommended to incorporate the fragrance during the appropriate liquid phase in order to achieve even dispersion. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced and long-lasting oriental-floral character.
