

TECHNICAL DATA SHEET

Black Vanilla – Reed Diffuser Refill

Product name: Black Vanilla – Reed Diffuser Refill

Olfactory classification:

Black Vanilla Fragrance Oil belongs to the gourmand–oriental fragrance family, characterized by a warm, sweet, creamy, and subtly spicy profile. The composition combines rich vanilla and caramel notes with floral and woody–musky accords, creating remarkable depth and long-lasting performance.

Fragrance oil description:

The composition is rich, warm, and enveloping, with a medium to strong intensity and stable scent diffusion in interior spaces. The fragrance profile is sweet, creamy, and sensual, delivering a pronounced feeling of warmth and comfort. The opening is built around a blend of monoï accord, apple, caramel, and cinnamon. Monoï provides an exotic and softly floral warmth, apple introduces a fresh fruity nuance, while caramel contributes fullness and pronounced sweetness. Cinnamon adds a discreet spicy dimension, creating a rich and pleasant first impression.

In the heart of the composition, a harmonious accord develops around vanilla, moss, and orange blossom. Vanilla provides intense sweetness and softness, moss introduces a subtle damp and natural depth, while orange blossom contributes a delicate luminous floral tone. Together, these notes create a stable and well-rounded core.

The base structure is founded on musk, amber, and sandalwood. Musk provides powdery softness and lasting persistence, amber adds warmth and richness, while sandalwood contributes a creamy woody foundation. The dry-down is long-lasting, warm, and comforting, with a pronounced sensory softness.

The dominant accords of this composition include gourmand sweet, vanilla warm, musky soft, and woody creamy facets, which together create a rich and commercially attractive fragrance profile. The gourmand and vanilla aspects remain dominant, while the base ensures excellent stability and fragrance longevity.

TECHNICAL DATA SHEET

Application:

Black Vanilla Fragrance Oil is intended for use in reed diffusers as a ready-to-use refill, where the formulation has already been optimized for direct application without additional dilution. Within this system, it provides even and long-lasting fragrance diffusion throughout interior spaces. Use with rattan reeds is recommended, with occasional reed turning to maintain continuous evaporation and stable scent distribution. Application in other product types is not recommended due to the specific formulation and technological limitations.
