

TECHNICAL DATA SHEET

Chalet in Lapland Fragrance Oil

Product name: Fragrance oil "Chalet in Lapland".

Olfactory classification:

Chalet in Lapland Fragrance Oil belongs to the woody-oriental fragrance family, with a pronounced warm, spicy, and rustic-elegant character. The composition combines citrus and spicy notes with rich woody, leathery, and vanilla accords, creating a warm and enveloping olfactory profile.

Fragrance description:

The composition is rich, warm, and sophisticatedly rustic, with medium to strong intensity and stable diffusion. The scent profile is woody, spicy, and subtly leathery, with a pronounced sense of warmth and comfort.

The opening is built around a combination of bergamot, nutmeg, and grapefruit. Bergamot provides a fresh citrus brightness with a mild bitter nuance, nutmeg contributes a warm spicy depth, while grapefruit introduces an energetic citrus freshness that illuminates the initial impression of the composition.

In the heart, a woody-spicy accord develops, dominated by patchouli, clove, and sandalwood. Patchouli adds an earthy and slightly mystical depth, clove brings a spicy-floral intensity with subtle peppery facets, while sandalwood introduces a creamy woody fullness and softness. This combination forms a rich and stable heart with a pronounced warm, wooden-interior effect.

The base structure is built on a leathery accord, vanilla, and cedarwood. The leather accord provides warm and elegant depth, vanilla contributes a soft and enveloping sweetness, while cedarwood offers a stable woody backbone and extends the longevity of the composition. The dry-down is rich, warm, and long-lasting, with a pronounced sense of sensory comfort and rustic elegance.

The dominant accords of this composition include woody warm, leather oriental, spicy aromatic, and soft vanilla facets, which together form a sophisticated and highly commercially appealing fragrance character. The woody and spicy-oriental aspects remain dominant throughout the evolution of the scent, while the base ensures stability and extended longevity.

TECHNICAL DATA SHEET

Application:

Chalet in Lapland Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax melts, and other perfumery products. Individual testing is recommended to determine the optimal concentration depending on the type of base and the desired fragrance intensity. In wax-based formulations, it is recommended to add the fragrance during the appropriate phase of the liquid wax to ensure even dispersion. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates good stability and even diffusion, with a pronounced and long-lasting woody-oriental character.
