

TECHNICAL DATA SHEET

Citrus Peel Ornat Fragrance Oil

Product name: Fragrance oil "Ornat Citrus Peel".

Olfactory classification:

Ornat Citrus Peel Fragrance Oil belongs to the citrus-aromatic fragrance family, with a pronounced fresh, green, and naturally citrus character. The composition combines vibrant citrus peel notes with herbal and subtly floral nuances, enhanced by a strong sense of natural freshness.

Fragrance description:

The composition is bright, refreshing, and naturally citrusy, with a clean and energetic character. The fragrance has medium intensity and very good diffusion, with a pronounced effect of natural citrus freshness.

The opening is built around mandarin and orange. Mandarin contributes juicy fruity sweetness and gentle warmth, while orange delivers refreshing citrus brightness with a subtle tart nuance. This combination creates a vibrant and energetic first impression reminiscent of freshly peeled citrus fruit.

In the heart, a blend of petitgrain and orange blossom develops. Petitgrain provides a woody-green character with a slightly bitter aromatic nuance, while orange blossom introduces soft floral smoothness and elegant citrus warmth. Together, these notes create a sophisticated aromatic depth and a naturally balanced composition.

The base is formed around verbena and lemongrass. Verbena contributes herbal lemon-like freshness with a soft calming facet, while lemongrass adds a sharper green-citrus intensity and a clean, uplifting effect. The dry-down is light, fresh, and highly natural, with a long-lasting sense of cleanliness and vitality.

The dominant accords of this composition include citrus peel, fresh herbal, green aromatic, and soft floral facets. The fragrance has a modern natural character, especially suited for formulations requiring a clean, refreshing, and naturally citrus olfactory profile.

Application:

Ornat Citrus Peel Fragrance Oil is intended for use in scented candles, wax melts, and

TECHNICAL DATA SHEET

other fragrance formulations of natural origin. Thanks to its certified formulation, the fragrance is suitable for products developed in accordance with COSMOS Natural and COSMOS Organic standards. A recommended usage level is typically 5–7%, allowing preservation of the natural sophistication and olfactory balance of the composition. Individual testing is recommended to optimize performance in different wax types and bases. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates very good stability and diffusion, with a pronounced natural citrus–herbal character.
