

TECHNICAL DATA SHEET

Citrus & Sage Fragrance Oil

Product name: Fragrance oil "Citrus and Sage".

Olfactory classification:

Citrus & Sage Fragrance Oil belongs to the citrus–aromatic fragrance family, with a pronounced fresh, herbal, and elegantly woody character. The composition combines vibrant citrus notes with aromatic herbal accords and a warm musky-woody base, creating a sophisticated and modern fragrance profile.

Fragrance description:

The composition is refreshing, elegant, and aromatically well-balanced, with medium intensity and stable diffusion. The scent profile is citrusy, herbal, and subtly woody, with a pronounced sense of cleanliness and energetic freshness.

The opening is built around a combination of bergamot, lemon, and mandarin. Bergamot provides a refined citrus freshness with a mild bitter nuance, lemon contributes bright and zesty citrus energy, while mandarin adds juicy fruity sweetness and warmth. This combination creates a vibrant and refreshing initial impression.

In the heart, a rich aromatic–herbal accord develops, dominated by cardamom, basil, and petitgrain. Cardamom adds warm spicy depth and aromatic complexity, basil contributes a green and slightly peppery freshness, while petitgrain introduces a woody-citrus depth with subtle floral undertones. This combination forms an elegant and harmonious heart with a pronounced natural and sophisticated character.

The base structure is built on clary sage, sandalwood, and musk. Clary sage provides an herbal and slightly aromatic depth with soft lavender-like nuances, sandalwood contributes warm creamy woody fullness, while musk delivers a soft, clean, and long-lasting finish. The dry-down is smooth, sophisticated, and enduring, with a pronounced sense of freshness and sensory comfort.

The dominant accords of this composition include citrus fresh, aromatic herbal, woody soft, and musky clean facets, which together form a modern and highly commercially appealing fragrance character. The citrus and herbal aspects remain dominant throughout the evolution of the scent, while the base ensures stability and extended longevity.

TECHNICAL DATA SHEET

Application:

Citrus & Sage Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax melts, diffusers, and bar soaps. Recommended usage levels are 7–10% for candles, 10–15% for wax melts, and 3–5% for bar soaps, with adjustments depending on the type of base and desired intensity. In wax-based formulations, it is recommended to add the fragrance to the liquid wax at a temperature between 72 °C and 75 °C with gentle stirring to ensure even dispersion. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates good stability and even diffusion, with a pronounced and long-lasting citrus–aromatic character.
