

TECHNICAL DATA SHEET

Coconut Snow Ornat Fragrance Oil

Product name: Fragrance oil "Coconut Snow Ornat".

Olfactory classification:

Coconut Snow Ornat Fragrance Oil belongs to the gourmand–powdery and creamy–woody fragrance family, with a pronounced warm, milky-creamy, and elegantly powdery character. The composition combines coconut, vanilla, and almond notes with soft woody accords, creating a sophisticated and soothing olfactory profile.

Fragrance description:

The composition is soft, creamy, and deeply comforting, with a warm gourmand character and an elegant powdery finish. The fragrance has medium to rich intensity, very good diffusion, and a smooth, long-lasting trail.

The opening is built around a combination of chestnut, almond powder, and green tea. Chestnut provides a gentle woody-sweet warmth with a roasted gourmand impression, while almond powder adds a soft nutty powderiness. Green tea introduces a light herbal freshness that balances the sweetness and adds airiness to the composition.

In the heart, a blend of iris, coconut, and coumarin develops. Iris delivers an elegant powdery sophistication with soft floral nuances, while coconut adds rich creamy fullness and a milky tropical warmth. Coumarin, with its hay-like, vanilla, and slightly balsamic facets, enhances the sense of warmth and comfort, creating a smooth and well-rounded heart.

The base structure is built on sandalwood, vanilla milk, and floral honey. Sandalwood provides a soft woody depth with creamy texture, while vanilla milk wraps the composition in warm gourmand sweetness. Floral honey adds a delicate floral-medicinal richness, leaving a refined and luxurious finish.

The dominant accords of this composition include creamy coconut, powdery almond, vanilla milk, soft sandalwood, and warm gourmand facets. The fragrance evokes warmth, comfort, and luxurious softness, making it especially suitable for cozy, gourmand, and elegant ambient formulations.

TECHNICAL DATA SHEET

Application:

Coconut Snow Ornat Fragrance Oil is intended for use in scented candles, wax melts, and other fragrance formulations of natural origin. A recommended usage level is typically 5–7%, allowing preservation of the subtlety and richness characteristic of the Ornat natural fragrance collection. In wax-based formulations, compatibility testing with different wax types is recommended to optimize diffusion and intensity. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates very good stability and a long-lasting creamy gourmand character.
