

TECHNICAL DATA SHEET

Malagasy Wood – Reed Diffuser Refill

Product name: Malagasy Wood – Reed Diffuser Refill

Olfactory classification:

Malagasy Wood Fragrance Oil belongs to the woody–oriental fragrance family, characterized by a warm, spicy, and subtly gourmand profile. The composition is structured around creamy woody notes enriched with sweet and spicy accents, supported by a soft musky base that contributes depth and long-lasting performance.

Fragrance oil description:

The composition is warm, intense, and well-rounded, with a medium to strong intensity and pronounced persistence in interior spaces. The fragrance profile is rich, sensual, and long-lasting, with a noticeable effect of pleasant ambient warmth. The opening is created through the contrast between the sweet aromatic nuances of black licorice and the exotic floral character of ylang-ylang. This combination creates an intriguing balance between brighter, sunlit facets and darker spicy tones, resulting in a distinctive and captivating introduction to the composition.

In the heart of the fragrance, a dense and creamy structure develops, dominated by sandalwood, vanilla, and clove. Sandalwood provides a soft woody foundation, while vanilla introduces warm sweetness and fullness. Clove adds a subtle spicy sharpness and complexity, creating a rich and textured fragrance core.

The base structure is founded on musk, vetiver, and coconut. Musk contributes softness and longevity, vetiver introduces dry woody elegance, while coconut provides a delicate milky and exotic nuance. Together, these notes create a stable and long-lasting scent trail with a pronounced feeling of warmth and comfort.

The dominant accords of this composition include woody warm, spicy, sweet gourmand, and musky facets, which together form a rich and multilayered fragrance profile. The woody aspect remains the central element of the composition, while the spicy and sweet nuances contribute depth and sensory complexity.

TECHNICAL DATA SHEET

Application:

Malagasy Wood Fragrance Oil is intended for use in reed diffusers as a ready-to-use fragrance refill, where the formulation has already been optimized for direct application without additional dilution. Within this system, it provides stable and even diffusion, ensuring long-lasting fragrance presence in interior spaces. Use with rattan reeds is recommended, with occasional reed turning to maintain continuous evaporation and uniform scent distribution. Application in other product types is not recommended, as the formulation is not adapted for different technological systems.
