

TECHNICAL DATA SHEET

Sunny Tuberose Ornat Fragrance Oil

Product name: Fragrance Oil "Tuberose Soleil Ornat".

Olfactory classification: Tuberose Soleil Ornat Fragrance Oil belongs to the solar floral, creamy white floral and radiant oriental fragrance group, with a sunlit floral, creamy and warm exotic character. The composition combines notes of mandarin, bergamot, freesia, tuberose, ylang-ylang, vanilla and solar accords, creating a sophisticated and luxurious fragrance inspired by sunlight warmth and opulent white flowers.

Fragrance description: The composition has a rich floral-solar character with warm creamy nuances and pronounced floral fullness. The fragrance offers medium to strong projection, excellent longevity and an elegant sun-drenched floral trail.

The opening is built around mandarin and bergamot. Mandarin provides juicy citrus sweetness and soft fruity freshness, while bergamot adds a sparkling citrus clarity with subtle bitter nuances that brighten the top notes.

In the heart of the composition, freesia, tuberose and ylang-ylang develop. Freesia contributes light floral freshness with subtle spicy undertones that bridge the citrus opening with the rich floral heart. Tuberose dominates the composition with its intense, opulent and creamy white floral character, while ylang-ylang adds exotic warmth and sensual creamy depth, further enhancing the solar aspect of the fragrance.

The base structure is built on vanilla and a solar accord. Vanilla brings warm gourmand richness and a smooth creamy softness, while the solar accord evokes the sensation of sun-warmed skin, leaving a long-lasting and sophisticated trail.

The dominant accords of this composition include white florals, creamy tuberose, solar warmth, exotic ylang and soft vanilla. The fragrance leaves a luxurious, sunlit and elegantly floral impression.

Application: Sunny Tuberose Ornat Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations.

TECHNICAL DATA SHEET

It is particularly suitable for solar floral, white floral and summer-inspired collections due to its rich sun-floral character. The recommended concentration in wax-based formulations is approximately 5–7%, with mandatory prior testing for compatibility and diffusion. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in Grasse, France, and manufactured in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards.
