

TECHNICAL DATA SHEET

Ylang Tea Ornat Fragrance Oil

Product name: Fragrance Oil "Ylang Tea Ornat".

Olfactory classification: Ylang Tea Ornat Fragrance Oil belongs to the floral spicy, aromatic tea and earthy woody fragrance group, with an elegant floral, spicy and aromatic woody character. The composition combines notes of ylang-ylang, bergamot, cardamom, rose, clove, violet, tea and patchouli, creating a sophisticated and warm fragrance with pronounced aromatic depth.

Fragrance description: The composition is elegant, aromatic and subtly exotic, with warm floral and spicy nuances. The fragrance offers medium to strong intensity, very good diffusion and a long-lasting sophisticated trail.

The opening is built around ylang-ylang, bergamot and cardamom. Ylang-ylang brings rich tropical floral depth with a soft creamy exotic nuance, while bergamot adds citrus freshness and a refined bitter accent. Cardamom introduces a warm aromatic-spicy dimension, giving the composition a dynamic and sophisticated opening.

In the heart of the composition, rose, clove, violet and tea develop. Rose and violet create a soft elegant floral accord with a subtle powdery character, while clove adds warm spicy depth and aromatic intensity. Tea contributes a light herbal transparency and calming freshness that balances the floral-spicy core.

The base structure is built on patchouli. Patchouli provides earthy woody richness, a soft musky depth and a warm long-lasting finish that stabilizes the composition and enhances longevity.

The dominant accords of this composition include exotic ylang floral, aromatic tea, spicy cardamom, powdery violet and earthy patchouli. The fragrance leaves an elegant, warm and sophisticated aromatic impression.

TECHNICAL DATA SHEET

Application: Ylang Tea Ornat Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for premium floral collections, spa-inspired products and sophisticated aromatic compositions due to its floral, tea and woody profile. The recommended concentration in natural-based formulations is approximately 5–7%, with prior testing for compatibility and diffusion in different wax systems advised. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards, with potential suitability for COSMOS Natural and COSMOS Organic concepts.
