

TECHNICAL DATA SHEET

Product Name: 215 Candle Fragrance Oil.

Olfactory classification: 215 Fragrance Oil belongs to the aldehydic floral, powdery woody and warm amber fragrance groups, with a pronounced clean, floral and elegantly warm character. The composition combines an aldehydic accord with bergamot, lemon, neroli, jasmine, rose, lily of the valley, iris, vetiver, sandalwood, vanilla and amber, creating a sophisticated fragrance with a luminous opening, an opulent floral heart and a warm woody-amber base.

Fragrance oil description: The composition is elegant, airy and distinctly floral, with powdery nuances and a warm, sensual finish. The fragrance has medium to high intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around an aldehydic accord, bergamot, lemon and neroli. The aldehydic accord provides a clean, airy and luminous character, while bergamot and lemon introduce sparkling citrus freshness. Neroli contributes delicate citrus-floral depth with a subtle bitter nuance, creating a complex and elegant introduction. Jasmine, rose, lily of the valley and iris unfold in the heart. Jasmine and rose provide rich and intense floral fullness, while lily of the valley contributes clean, spring-like freshness. Iris introduces powdery elegance and delicate earthy depth, forming a sophisticated and harmonious floral bouquet. The base is built around vetiver, sandalwood, vanilla and amber. Vetiver provides a dry, earthy and subtly smoky woody nuance, while sandalwood contributes creamy warmth and softness. Vanilla introduces pleasant sweetness, and amber provides rich balsamic depth and long-lasting warmth in the finish. The dominant accords include aldehydic freshness, floral bouquet, powdery iris, creamy sandalwood and warm amber. The fragrance leaves a clean, opulent and elegantly warm trail.

Applications: 215 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for aldehydic, floral, powdery and amber-woody collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.

TECHNICAL DATA SHEET

Regulatory compliance: The fragrance oil is manufactured in accordance with the relevant requirements of Regulation (EC) No 1907/2006 (REACH), Regulation (EC) No 1272/2008 (CLP) and the applicable Standards of the International Fragrance Association (IFRA).

Animal testing: The fragrance oil has not been tested on animals.
