

AVENAMAKER® SILICONE

1. IDENTIFICATION

Product Name: AvenaMaker® Silicone
INCI Name: Cetyl diglyceryl tris(trimethylsiloxy)silylethyl dimethicone
CAS Number: 1466529-58-7
Product Form: Solid paste
Product Use: Cosmetic use

Supplier of the MSDS: Avena Lab, Farmadria d.o.o.
Address: Heroja Pinkija 44, Vršac
Telephone: +381(0)695565028 or +381(0)695565029
Website: www.avenalab.com
Email: info@avenalab.com

2. HAZARD(S) IDENTIFICATION

GHS Classification: Flammable Liq. 3
GHS Signal Word: **WARNING!**

GHS Hazard Pictograms:

GHS Hazard Statements: H226: Flammable liquid and vapor
GHS Precautionary Statements: P271: Use only outdoors or in a well-ventilated area
 P210: Keep away from heat/sparks/open flames/hot surfaces - No smoking
 P243: Take precautionary measures against static discharge
 P102: Keep out of reach of children
 P273: Avoid release to the environment

Potential Health Hazards:
 Eyes: May be irritant.
 Inhalation: Not expected to be irritant.
 Skin: Not expected to be irritant.
 Ingestion: May be irritant.

NFPA Ratings (704):

Health	1	Slight
Flammability	1	Slight
Reactivity	0	Minimal
Specific Hazard	n/a	

3. COMPOSITION/INFORMATION ON INGREDIENTS

<u>Component</u>	<u>CAS No.</u>	<u>Weight %</u>	<u>Molecular Weight</u>
Cetyl diglyceryl tris(trimethylsiloxy)silylethyl dimethicone	1466529-58-7	100%	n/a

4. FIRST-AID MEASURES

Eyes:	In case of eye contact, rinse with plenty of water for at least 15 minutes and seek medical attention if necessary.
Inhalation:	Move casualty to fresh air and keep at rest. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention if necessary.
Skin:	Flush with plenty of water and wash using soap.
Ingestion:	Do Not Induce Vomiting! Never give anything by mouth to an unconscious person. Get medical attention if necessary.

5. FIRE-FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media:	May be combustible at high temperature. Use appropriate media (foam, carbon dioxide, dry chemical, water spray) for adjacent fire. Do not use water.
Special protective equipment and precautions for firefighters:	Wear self-contained, approved breathing apparatus and full protective clothing, including eye protection and boots.
Flash Points:	Closed cup: 198°C (388°F)
Specific hazards arising from the chemical:	May emit toxic fumes under fire conditions. See also Stability and Reactivity section.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:	See section 8 for recommendations on the use of personal protective equipment.
Environmental precautions:	Not available
Methods and materials for containment and cleaning up:	Sweep up and place in suitable, closed containers for disposal. Clean surfaces thoroughly with water to remove residual contamination. Dispose of all waste and cleanup materials in accordance with regulations.

7. HANDLING AND STORAGE

Precautions for safe handling:	When heated to temperatures above 150°C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer, and an irritant to the eyes, nose, throat, skin and digestive system. Keep vapor concentrations within the OSHA permissible exposure limit for Formaldehyde. See section 8 for recommendations on the use of personal protective equipment. Keep container closed when not in use.
Conditions for safe storage, including any incompatibilities:	Store in cool, dry well ventilated area. Keep away from heat and incompatible materials (see section 10 for incompatibilities).

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<u>Component</u>	<u>Exposure Limits</u>
PEG-40 Hydrogenated Castor Oil	N/A

Personal Protection:

- Eyes:** Not required, but wear chemical safety glasses or goggles.
Inhalation: Not needed under normal conditions of use.
Body: Suitable gloves. Slip proof shoes may be worn where spills may occur.
Other: Provide eyewash stations, quick-drench showers and washing facilities accessible to areas of use and handling.

Note: These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions. For further information regarding aerosol inhalation toxicity, please refer to the guidance document regarding the use of silicone.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid	Viscosity:	2,000-5,000 mm ² /s
Odor:	Characteristic	Flash Point:	198°C (388°F)
Taste:	No data available	Specific Gravity @ 25°C:	0.94
Color:	Colorless to light brown	Vapor Density:	Not determined
Calculated HLB:	2	Evaporation Rate:	Not available
pH (1% sol. in water)	Not determined	Flammability:	May be combustible
Refractive Index, @ 25°C:	1.43	Upper/lower Explosive Limit:	Not determined
Melting Point:	Not applicable	Solubility:	Not water soluble

10. STABILITY AND REACTIVITY

Reactivity:	Product is stable.
Chemical stability:	Product is stable.
Hazardous Polymerization:	Will not occur.
Conditions to avoid:	High heat.
Incompatible materials:	Oxidizing material can cause a reaction.
Hazardous decomposition products:	Thermal breakdown of this product during fire or very high heat conditions may evolve the following decomposition products: carbon oxides and traces of incompletely burned carbon compounds, silicone, and formaldehyde.

11. TOXICOLOGICAL INFORMATION

Acute Oral Toxicity:	No data available
Skin:	No significant irritation expected from single short-term exposure.
Eye:	Direct contact may cause temporary redness and discomfort.
Respiratory:	No significant effects expected from a single short-term exposure.
Ingestion:	Low ingestion hazard in normal use.
Carcinogenicity:	Not available
Teratogenicity:	Not available
Germ Cell Mutagenicity:	Not available
Embryotoxicity:	Not available
Specific Target Organ Toxicity:	Not available
Reproductive Toxicity:	Not available
Respiratory/Skin Sensitization:	Not available

12. ECOLOGICAL INFORMATION

Toxicity to Water Organisms:	Based on analogy to similar materials this product is expected to exhibit low toxicity to aquatic organisms.
Toxicity to Soil Organisms:	Experiments show that when sewage sludge containing polydimethylsiloxane is added to soil, it has no effect on soil microorganisms, earthworms, or subsequent crops grown in soil.
Persistence and Degradability:	Degrades in soil abiotically to form smaller molecules. These in turn are either biodegraded in soil or volatilized into the air where they are broken down in the presence of sunlight. Under appropriate conditions, the ultimate degradation products are inorganic silica, carbon dioxide and water vapor. Due to the very low water solubility of this product, standard OECD protocols for ready and inherent biodegradability are not suitable for measuring the biodegradability of this product. The product is removed >80% during the sewage treatment process.
Bioaccumulative Potential:	This product is a liquid and is a high molecular weight polymer. Due to its physical size it is unable to pass through or be absorbed by biological membranes. This has been confirmed by testing or analogy with similar products.
Mobility in Soil:	If discharged to surface water, this product will bind to sediment. If discharged in effluent to a waste water treatment plant, the product is removed from the aqueous phase by binding to sewage sludge. If the sewage sludge is subsequently spread on soil, the silicone product is expected to degrade.
PBT and vPvB Assessment:	Not available
Other Adverse Effects:	This product or similar has been shown to be non-toxic to sewage sludge bacteria.

13. DISPOSAL CONSIDERATIONS

Waste Residues:

Users should review their operations in terms of the applicable federal/national or local regulations and consult with appropriate regulatory agencies if necessary before disposing of waste product container.

Product Containers:

Users should review their operations in terms of the applicable federal/national or local regulations and consult with appropriate regulatory agencies if necessary before disposing of waste product container.

The information in section 13 is for the product as shipped. Use and/or alterations to the product may change the characteristics of the material and alter the waste classification and proper disposal methods

14. TRANSPORT INFORMATION

DOT (Dept. of Transportation, USA):	Not regulated
TDG (Transportation of Dangerous Goods, Canada):	Not regulated
IMDG (International Maritime Dangerous Goods):	Not regulated
IATA (International Air Transport Association):	Not regulated
ICAO (International Civil Aviation Organization):	Not regulated

15. REGULATORY INFORMATION

TSCA Inventory Status:	Included or exempted from listing
DSCL (EEC)	No data available
WHMIS (Canada):	No data available
SARA 302 [40CFR355]:	Non hazardous
SARA 304 [40CFR302]:	Non hazardous
SARA 311/312 [40CFR372]:	None present or none present in regulated quantities.
California Prop 65:	No components contain chemicals known to cause cancer, birth defects, or reproductive harm.

16. OTHER INFORMATION

Revision Date: 11-04-2017

Compliance: This document has been prepared in accordance with the SDS requirements of the OSHA Hazard Communication Standard 29 CFR 1910.1200

Disclaimer: Avena Lab, Farmadria d.o.o. cannot anticipate all conditions under which this information and its product, or the products of other manufacturers in combination with its product, may be used. It is the user's responsibility to ensure safe conditions for handling, storage and disposal of the product, and to assume liability for loss, injury, damage or expense due to improper use. The above information relates only to this product and not to its use in combination with any other material or any particular process and is designed only as guidance for the safe handling, use, processing, storage, transportation, and disposal and should not be considered as a guarantee or quality specification. It is the sole responsibility of the individual(s) purchasing this product to assess its' safety in the final application. The above information is based on data provided by and collected from recognized sources such as distributors, manufacturers, and technical groups and is considered to be accurate to the best of our knowledge. Appropriate warnings and safe handling procedures should be provided to all handlers and users, taking into account the intended use and the specific conditions and factors relating to such use in accordance with all applicable laws and regulations.
