Information about presence and concentration of fragrance ingredients subject to IFRA Standards in the fragrance mixture MIRIS WEANI 5247 is as follows:

Materials under the scope of IFRA Standards

| | | CAS Registry Number | Conc. (%) |
|--|------------------------------------|----------------------------|------------------|
| C00711 | Hydroxypropyloxypropanol | (CAS 25265-71-8) | 24,7456 % |
| Categories (Category name: limit): (Category 1: Not allowed;Category 6: Not allowed;) | | | |
| ALL_COSM021 | Linalool | (CAS 78-70-6) | 12,3049 % |
| Recommendation from IFRA Standard: Specification: Oxidation products of Linalool, especially hydroperoxides, have been demonstrated to be potent sensitizers. d-, l- and dl-Linalool and natural products containing substantial amounts of it, should only be used when the level of (hydro)peroxides is kept to the lowest practical level, for instance by adding antioxidants at the time of production. The addition of 0.1% BHT or a-Tocopherol for example has shown great efficiency. Such products should have a peroxide value of less than 20 millimoles per liter, determined according to the IFRA analytical method for the determination of the peroxide value, which can be downloaded from the IFRA website. | | | |
